

BS Banktechnik GmbH Chemnitz (Germany)

“SAP Business One provides tools for evaluations and analyzes for and by decision makers.”

“

We can process data in real time, according to the specific needs. The complete package and the illustration respectively the transfer of business processes are in our main focus. The availability of the whole data allows us to issue our own metrics and evaluate internally.

Reasons for choosing SAP

- We had previously worked with small IT companies. Unfortunately they were not able to react in order to adapt the Software according to our requirements.
- We needed an enduring business partner who is offering good solutions over years. Also SAP was chosen to act flexible on the rapid development and to expand IT functionalities.
- Our SAP Business One has great potential and opportunities, which we intend to use more in the future. In our opinion the speed advantage of the SAP HANA Architecture is the right choice for our future.

Key benefits

- We have special demands as a service company and need a good overview as well as service coordination. Now we`re also able to have a good mapping on staff, our equipment and customer equipment.
- SAP Business One provides tools for evaluations and analyzes for and by decision makers.
- Furthermore we have to use other software solutions and appreciate the fact of compatibility with other programs and integration of IT systems.
